

Trane Replacement Evaporators & Condensers for Australian Products

Heuch Pty Ltd, established 1970, have been supplying replacement **Trane** EVP and CDS Pressure Vessels for direct replacement since 1997. These vessels are available as single units for resale to authorised **Trane** Service organisations only.

An almost limitless number of external finishes can be specified. Insulation for evaporators as standard is 19mm "Armaflex" and foams with vapour sealed cladding can be included.*

Mounting feet and equipment brackets may also be supplied if requested.*

Each pressure vessel includes two copies of the Manufacturers Data Report and manufacturing test certificates in accordance with AS1210.

Heuch Pty Ltd is Third Party accredited to the ISO 9000 series Quality Standards. Inspection by independent agencies such as "Lloyds Register" or "Bureau Vertias" can be accommodated.*

Evaporators and Condensers may be supplied with or without Heads.

The standard vessel is manufactured with Carbon Steel Shells and Tubeplates with copper tubing. Evaporators utilise plain tube whilst the condensers include finned tube.

The vessels may be manufactured with alternate materials including Cupro-nickel tubing, 316 and SAF Duplex Stainless Steel Tube Plates.*

Head construction varies between cast iron and carbon steel depending upon the original model design and casting availability. Internal long life coatings can be applied.*

The standard paint finish is grey undercoat and again a variety of alternate finishes may be specified.*

- *These items or services may attract additional costs, contact Heuch Engineering Services.*
