

Heuch Water Temper Units are manufactured in a variety of style to suit industry requirements. Variations include open and closed loop systems suitable for single and multiple circuit application.

Each unit is housed in a robust, switchboard style cabinet with easy access to the internal components for service and maintenance.

Operator controls are generally located on the end of the units so that access to the internal components is maximized. Alternate arrangements can be accommodated to suit specific site needs.

The standard temperature controller are of the Innotech Genesis or Maxim series which includes data logging for service and maintenance activities.

Site standards can be accommodated with alternate controllers upon request.

The backbone of the Heuch Water Temper Units is a hot dipped galvanized, welded steel subframe from which all major components are mounted. The frame includes forklift tyne cutouts on most bases allowing for easy installation and positioning. External protective coatings are 3-stage powder coat finish as standard. Most industry colours are available so that the unit can be co-coordinated with plant colour schemes. Alternative coatings can be supplied.

The standard cabinet construction is to industrial switchboard standards for internal operations. Options for alternative materials include aluminium and stainless steel.

Process connections are top entry and exit. Connections up to and including Ø50NB are BSP thread. Connections greater than Ø50NB are flanged to AS2129-E. ANSI or Din Flanges can be supplied as an alternative.

Internal Process pipework is copper with most valves of brass or cast iron construction. Again alternative materials are an option including black and gal steel, stainless steel and PVC – ABS.

Heuch Pty Ltd is a leading Australian designer and manufacturer of special purpose refrigeration equipment and systems.

Founded in 1970, Heuch Pty Ltd has established itself as a leader in its field. The companies manufacturing facilities in Moorabbin, Victoria, Australia, produces an extensive range of refrigeration equipment, servicing many industries including.

Our company's aim is to produce technically advanced, quality products and equipment. We take pride in our ability to design and manufacture a vast range of equipment here in Australia, but from its inception Heuch has aligned itself with international technical specialists to ensure the best and latest plant and technology is made available to our customers.

Heuch Pty Ltd is an ISO 9001 accredited company.
